## 2.14 HOTEL, SERVICES AND SPORT FACILITIES - BUS STOP NR.

The basic plan is to create an efficient bus transportation system that will connect hotels, sports venues and the Olympic Park in the shortest period possible.

The main hub will be dislocated in Borgo Maggiore, a very centralized zone of the territory. From here, you can get all the connections needed to reach any destination. The maximum time to reach any sports venue is approximately 20 minutes, but the average time will surely be lower.

The final plan, with all the details will be established when all the sports venues and hotels are confirmed.

It is important to point out that this system takes into account the safety of the athletes and all the accredited members of the various delegations. In fact, no road crossing is necessary because of the

circular system that has been adopted.

In order to simplify the bus connections a dedicated brochure will be distributed to every accredited person, but most of all volunteers in the hotels, on the sports venues and on each bus will give all the needed information.

The starting time in the morning and the final transportation time at night will be the following:

TBD

### TRANSPORTATION AT ARRIVAL

Information areas will be organized in the Airport of Rimini and Bologna. From these locations, buses will be organized according to the size of each delegation, in order to bring them to the assigned hotels. The same will be organized for the departure of each delegation.

## San Marino Historical Origins and Legends

During the year 257 AD the emperor Diocletian issued a decree calling for the reconstruction of the city walls of Rimini which were destroyed by Demosthenes, King of the Liburnians. Among the stone cutters and engravers who came from all over Europe, there were two, who came from Dalmatia (and specifically from the Island of Rab now Croatia), and were destined to be remembered throughout history: **Mari-no** and **Leo**.

It is not certain if they were searching for employment or were fleeing from some religious persecutions. Shortly after their arrival on Rimini territory, they were sent to Mount Titano to extract and process various types of stone; they remained there for three long years.

Later the two companions decided to go their separate ways: Leo decided to remain on Mount Feliciano (also called Monte Feretrio or Feltro), digging a cell in the rock and building, with his travelling companions, a small oratory in honor of God. The settlement, thus founded, will later in history take on the name of **San Leo**.

Marino, instead, decided to return to Rimini and remained there for 12 years and 3 months, as narrat-

ed in epigraphs. During this period, he continued to profess his faith and lead a life of penitence. Later, he withdrew to Mount Titano where he founded a small community of Christians. During this period on Mount Titano, it is said that Marino accomplished miracles; such as, healing a Dalmatian sinner possessed by the devil (who was disturbed by the sanctity of Marino). The woman attempted to circumvent him by affirming to be his legitimate wife. Or, the time he is said to have tamed a bear.

The most important miracle, however, was the encounter with **Verissimo**, son of the noblewoman and widow, **Felicissima** (or Felicity), owner of the territory of Mount Titano. Verissimo disputed

the residence of Marino on his territory and Marino, predicting the menacing intentions of the young man, prayed to the Divine Providence for help. In that very moment, Verissimo fell paralyzed in his legs and arms. The mother, in her desperation, rushed to the Saint to ask his pardon and to offer him anything he desired. The Saint replied that he had no other desire but their conversion, baptism and a plot of land to rest upon. Felicissima accepted and to express her appreciation and thanks, donated Mount Titano to Marino and all his descendants. Verissimo was healed and all 53 members of the family were converted to Christianity!

Marino, **ordained Deacon** by the Bishop of Rimini, continued his

life of meditation and prayer and, on **September 3rd** of perhaps the year 366, he died. This date is solemnly celebrated in the Republic.

This is the synthesis of what is contained in the writings on saints and martyrs by an anonymous of the XII century regarding San Marino (**“Vita Sancti Marini”**) - the Life of San Marino. It is difficult to determine the difference between truth and legend; however, for certain, we know that Demosthenes, King of the Libernians, never existed and that, if Diocletian ordered the walls of the city of Rimini to be rebuilt, it was not in the year 257. More specific studies date the life of San Marino sometime between 500 and 700 AD. It is also possible that the story of the life of the Saint was, at least in part, falsified in order to defend the territorial patrimony of the Monastery of San Marino from the attempts to claim the territory by the Bishop of Rimini, **Placito Feretrano** (parchment of 885 AD where for the first time the name of San Marino has a specific territorial reference).

It is certain that the territory

was inhabited even in prehistoric times; however, it is only during the Middle Ages that we have proof of the existence of an organized community. Whatever the truth may be, the legend is most certainly the **true expression of the strong desire for independence of the inhabitants of Mount Titano** and confirms the evocative image of **“the ancient land of liberty”**.

### **Territory of San Marino**

In heart of Italy, on the border between the Emilia Romagna and Marche Regions, the Republic of San Marino has an overall extension of just **61,196 square kilometers**. It is the third smallest country in Europe, immediately after Monaco and Vatican City.

**Mount Titano** with its three jutting peaks is the symbol of the Country; it marks the beginning of the Tuscan-Romagna section of the Apennines and, with its 749 meters over sea level, it is the highest point in the Country. In effect, the mount has an unusual configuration as compared to the surrounding territory, which is prev-

alently hilly. Actually, it is a large sandy limestone rock, residual of the fragmentation of a large undersea plate over twenty-million years ago. Other fragments formed mounts, which today are called: Della Verna, Simoncello, Fumaiolo, San Leo.

Some mountain streams, beginning on Mount Titano, join the main rivers that flow across the San Marino territory; among these: the Marano and the Marecchia rivers that, after approximately twenty kilometers, flow into the Adriatic Sea: the Marano at Riccione and the Marecchia at Rimini. The lowest point in the Country is Falciano, Municipality of Serravalle, which is only 55 meters above sea level.

### **The Nine Municipalities**

Local government in the Republic of San Marino is organized in **nine Municipalities (“Castelli”)**, corresponding to the **Italian cities** but with more limited powers.

The term **“Castle”** originally referred to the **“Castrum Subdita”** (four ex-Malatesta castles: Fiorentino, Montegiardino, Faetano

and Serravalle) which became part of the San Marino territories in 1463 and since then are subject to the laws of the Republic and are governed by a “**Captain**” (Mayor) elected by the Grand and General Council. Later the term «Castle» was extended to other localities existing on Mount Titano - coinciding most of the time with the **church parishes**.

Even today, each district has its **Captain of the Castle**, corresponding to the **Mayor of Italian cities**. The Captain is in office for two years and his **Council** for five years. The number of members of the Councils varies; for districts with more than 2,000 inhabitants, the Council is made up of **nine members**; for districts with less than 2,000 inhabitants, the Councilors are **seven**. Local elections determine Captain as well as the Municipal Council members.

The competencies of the local governments are **very limited** in comparison to similar organs in the Italian political system. They propose to and consult with the Central Government as regards the management of public services and public works. Moreover, these Municipal Councils are very active in the promotion of cultural, recreational and social events, which involve the local population.

### The Municipalities (Castles):

- **City of San Marino**, the “Capital” with a population of 4,500 (9 Councilors);

- **Borgo Maggiore**, second most important city with a population of 5,992 (9 Councilors);
- **Serravalle**, the highest populated city with 9,394 inhabitants (9 Councilors);
- **Domagnano**, 2,714 inhabitants (9 Councilors);
- **Fiorentino**, with a population of 2,120 (9 Councilors);
- **Acquaviva**, with 1,678 inhabitants (7 Councilors);
- **Faetano**, with 1,081 inhabitants (7 Councilors);
- **Montegiardino**, with smallest and least populated city with 793 inhabitants (7 Councilors);
- **Chiesanuova**, with 976 inhabitants (7 Councilors).
