My main motivation to accept the nomination of the Management Board of the Bulgarian Cycling Federation, to elevate my candidacy for a member of the Management Board of the UEC is the opportunity to continue my public activity in the name of the development of cycling to a higher level in the hope of being useful enough for:

- Development and promotion of all types of disciplines in the "lagging behind" countries compared to the successful European cycling countries;
- To promote cycling in the Balkans, where significant European and World cycling events can be held, in every discipline, in any kind of cycling;
- To implement proven European practices in the development of cycling, so that the Balkans have numerous new sports facilities that meet the highest standards for training and competitions, so that the countries in the region become attractive destinations for sports and tourism;
- To help further develop the "Solidarity" programs, so that they reach a wider range of activities and satisfy the specific needs of each UEC member state;
- To help increase the results of the marketing and advertising activities of the UEC I believe that with my experience in the administration of sports and competitive activities and in organizing events, I would be useful for the activities of the Management Board of the UEC

Thank you for considering my application.

Sincerely,

Danail Angelov
